

Matías Baldanza

Developer Relations Engineer - Technical Content - Developer Education

Argentina (remote, US-hours compatible)

LinkedIn | Github | X/Twitter | +54 11 2576-9340 | matiasbaldanza@gmail.com | matiasbaldanza.dev/dotcms

ABOUT ME

Hands-on DevRel engineer: I research features, issues, and tools, I build working demos, write the docs and tutorials that explain them, and get in front of developers: on camera, in live workshops, in short- and long-form video, and in writing. Two decades of technical background (development, sysadmin, infrastructure, training) plus 10+ years producing technical content in native-level English and Spanish. I care about one metric above all: how fast a developer gets from “this looks interesting” to “I grok it (deeply understand it) and I’m using it effectively.”

EXPERIENCE

Developer Relations / Technical Content Creator — DonWeb Cloud & IaaS

Argentina/remote

DonWeb Cloud

2024-2025

- Created the developer-facing content program for DonWeb’s Cloud & IaaS products, reporting to the division’s Marketing Manager and Product Owner (VP of Product): tutorials, guides, video, and demos covering VPS, Linux, Docker, CI/CD with GitHub Actions, DNS/SSL, CMS platforms, and app deployment.
- Designed and delivered live programming and DevOps workshops (2x/month, 300+ sign-ups, 150+ live attendance).
- Sustained a video cadence of 3 short-form videos per week plus one in-depth long-form video per month across social channels, (in collaboration with a video editor/brand designer.)
- Built and tested every environment, command, and config shipped in content — and reviewed production VPS images, scripts, and configuration examples for correctness and reproducibility.
- Translated complex infrastructure workflows into onboarding paths for developers new to cloud tooling.
- Produced content and demos for product launches in other divisions (EnvialoSimple, Mi Cuenta) and internal training for L1 support staff.

Freelance Technical Content, Translation & Review — Fiverr / Upwork / Direct

Self-employed

2017-present · Top Seller status, 2,500+ completed projects, 96% repeat clients

- Produced and reviewed developer-facing content for international clients: API documentation, tutorials, training guides, white papers, and localization for US, UK, EU, and Australian tech companies.
- Built a Top Seller reputation on quality and reliability at high volume — 1,500+ positive reviews.
- English↔Spanish technical translation at native level across software, cybersecurity, networking, and developer education.

Content Creator — matiasbaldanza @ Twitch

Twitch/YouTube

2022-present

- Streamed daily learn-in-public sessions on front-end development (React, Next.js) from 2022-2024, averaging 100 concurrent viewers with peaks of 180–200 — comfortable on camera, live-coding, unscripted Q&A.
- Currently active on X and GitHub, building and sharing developer tooling experiments: AI coding agents (Claude Code, MCP servers), self-hosted infra, RAG/evals workflows.

Earlier career — IT Specialist / Sysadmin / Instructor

Various employers

1998-2017

- 13 years in networking, support, incident response, and systems administration (Generación WiFi S.A. and others), head of support for a local ISP and technical services company, outsourced to banks and enterprises for deployments and incident response. Wrote the documentation, checklists, and FAQs, trained technical staff.
- Instructor and Academic Coordinator at a training facility: designed and taught technical courses for corporate clients and an MCSE/MCP training center.

SKILLS

Frontend & APIs: JavaScript, TypeScript, React, Next.js, Astro; REST & GraphQL API integration, auth flows, SDK-based development

CMS & Content Platforms: Contentful, Sanity, Strapi, Directus, Payload, Ghost, WordPress

Infra & tooling: Linux, Docker/Compose, Nginx, Caddy, GitHub Actions, PostgreSQL, VPS/cloud deployment

AI developer workflows: Claude Code, Codex, MCP servers, RAG pipelines, evals, local models, agent-friendly documentation

Content & community: technical writing, documentation, screencasts, livestreaming (OBS), video editing (Final Cut Pro/Premiere), workshops, developer forums; bilingual EN (C2) / ES (native)

Backend: Node, Express, Hono, FastAPI, Python, PostgreSQL

EDUCATION

Universidad Nacional de la Patagonia San Juan Bosco, Argentina

Analista Programador Universitario — Associate Degree-level program in Systems Analysis and Programming
